

SUMIT PRAKASH SURYAVANSHI

+918600980911 ◇ Solapur, Maharashtra

Data Analyst | Tableau | SQL | Power BI | Python

PROFESSIONAL SUMMARY

Results-driven Data Analyst (BTech, 2026 Graduate — CGPA 9.51/10) with expertise in SQL, Python, Power BI, and Tableau. Experienced in building end-to-end data workflows — from raw data ingestion and cleaning to interactive dashboard delivery and business storytelling. Completed MNC-backed virtual internships with Deloitte Australia and Tata Group by Forage. Engineered an AI-driven healthcare system as a final year capstone, applying machine learning, real-time data pipelines, and NoSQL data management. Seeking a Data Analyst role where sharp analytical thinking and visualization skills drive measurable impact.

EDUCATION

Bachelor Of Technology in Electronics & Telecommunication Engineering 2026

Walchand Institute of Technology, Solapur | CGPA-9.51/10

Higher Secondar Certificate (HSC) 2022

Sangameshwar College | 68.67%

Secondary School Certificate (SSC)

K.L.E English Medium School, Solapur | 79.8% 2019

TECHNICAL SKILLS

Languages & Querying: Python (Pandas, NumPy, Matplotlib, Seaborn, OpenCV) | SQL | C Programming

BI & Visualization: Power BI | Tableau | Advanced Excel

Systems & Cloud: Iot Cloud – Hands on AWS Services (S3, Lambda, Athena), Linux OS, Git & GitHub

INTERNSHIP EXPERIENCE

InternPe Dec 2025 - Mar 2026

- Built a **Diabetes Prediction model** (Logistic Regression + Decision Tree) on a 768-record clinical dataset — achieved **77% accuracy and 0.82 F1-score**, demonstrating real-world application of supervised learning in healthcare analytics.
- Developed a **Car Price Prediction system** using Linear Regression and Random Forest — performed end-to-end EDA, feature engineering, and correlation heatmap analysis on 6,000+ vehicle records to identify key price drivers.
- Engineered a **Movie Recommendation System** using Content-Based and Collaborative Filtering — applied cosine similarity scoring across 45,000+ movie metadata records using Scikit-learn and Surprise Library.
- Consistently applied full **ML pipeline workflow** — data preprocessing, missing value treatment, feature selection, model training, and evaluation using Accuracy, Precision, Recall, F1-score, MSE, and R²

PROJECTS

AI-Powered Smart Healthcare Reminder System [Final Year Project]

- **Engineered an end-to-end AI healthcare platform** for chronic illness patients — integrating face detection, voice commands, and hand gesture recognition to deliver personalized, zero-miss medication reminders.
- **Trained custom ML models** using Python (OpenCV, scikit-learn) on annotated healthcare datasets for real-time face and gesture recognition with high accuracy under varied lighting conditions.
- **Designed a NoSQL (MongoDB) data layer** to securely store patient profiles, medication schedules, and alert logs — enabling fast querying and persistent local data management.
- **Integrated Telegram Bot API** to push real-time push notifications to caregivers and patients — ensuring 100% alert delivery even when the system UI is closed.
- Built a responsive frontend (HTML, CSS, JavaScript) providing a clean caregiver dashboard to manage patient records and monitor alert history.

Real-Time Data Pipeline & Analytics Dashboard

- Built a serverless AWS data pipeline (Lambda → S3 → Athena) to ingest, process, and query real-time sensor data streams at scale.
- Wrote SQL queries in AWS Athena to aggregate time-series data and feed a live Tableau dashboard
- tracking environmental KPIs and anomaly flags.

CERTIFICATIONS & VIRTUAL EXPERIENCE

Deloitte Australia Data Analytics Job Simulation on Forage

2025

- Completed a Deloitte job simulation involving data analysis and forensic technology
- Created a data dashboard using Tableau
- Used Excel to classify data and draw business conclusions

Deloitte Australia Cyber Job Simulation on Forage

2025

- Completed a job simulation involving reading web activity log
- Supported a client in a cyber security breach
- Answered questions to identify suspicious user activity

Tata Group Data Analytics Job Simulation on Forage

2025

- Completed a job simulation involving AI-powered data analytics and strategy development for the Financial Services team at Tata iQ.
- Conducted exploratory data analysis (EDA) using GenAI tools to assess data quality, identify risk indicators, and structure insights for predictive modeling.
- Proposed and justified an initial no-code predictive modeling framework to assess customer delinquency risk, leveraging GenAI for structured model logic and evaluation criteria.
- Designed an AI-driven collections strategy leveraging agentic AI and automation, incorporating ethical AI principles, regulatory compliance, and scalable implementation frameworks.

ACHIEVEMENTS & LEADERSHIP

- **Certifications:** Microsoft Data Analytics (2025) , Infosys Certified Python & C Programmer (2023)
- **Tech Saksham:** Completed Edunet Training Course (2024)
- **Team Lead, Smart India Hackathon 2024:** Directed a 6-members cross-functional team to design and deliver a regional language AI chatbot prototype under a national-level 36 hours hackathon deadline.
- **Event Organizer, Electrostimulation Technical Competition:** Managed a 15-member student committee to plan, coordinate and execute a college-level engineering competition in occasion of “Engineers Day”
